FOR IMMEDIATE RELEASE

Traffic switch to begin on US-275

Nov. 5, 2026 (Norfolk, Neb.) — Weather permitting, the week of Nov. 9, traffic on U.S. Highway 275 (US-275) will be switched onto the newly constructed lanes, from reference post 86.34 to reference post 97.59, according to the Nebraska Department of Transportation.

Hawkins Construction, of Omaha, is the contractor for this project. Work includes switching traffic onto the newly constructed lanes, which will allow for the construction of the new Humbug Creek bridge, culverts and new pavement on the existing US-275. Flaggers may be in use during the traffic switch. A 12-foot width restriction will be in effect. Work is anticipated to last one year.

Motorists are reminded to drive cautiously in and near work zones, to buckle up, and put phones down.
