Re: The State Transportation Improvement Program for FY 2026-2029

Attached is the Nebraska Department of Transportation's (NDOT) State Transportation Improvement Program (STIP) for fiscal years 2026 through 2029 for your review and approval. Metropolitan area projects are included by reference from their MTIP's.

NDOT made the Draft STIP available for public comment between August 15, 2025 and August 29, 2025 on our website and in the eight field district offices. We made notice of this availability through:

- A press release to 5,162 recipients including 276 media outlets statewide
- Tweet to 35,500 followers
- Gov Delivery note to 2,621 subscribers of RSS feed of our Twitter page
- Gov Delivery note to 1,298 subscribers of the STIP page

The Summary page in the body of the STIP demonstrates that the STIP is fiscally constrained by year.

In accordance with the self-certification requirements of Section 23 CFR 450.218, the NDOT certifies that each of the following planning process requirements are being carried out in a comprehensive, cooperative, and continuous manner:

- (1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304;
- (2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;

Vicki Kramer, Director

Department of Transportation

- (4) Section 1101(b) of the FAST Act (Pub. L. 114-94) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- (5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (6) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- (7) If the state should acquire nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination based on age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Sincerely,

Devin Townsend, P.E.
Program Management Engineer

Nebraska's Statewide Transportation Improvement Program Fiscal Years 2026–2029

Prepared by:

Program Management
Division September 1, 2025

Vicki Kramer—Director

Nebraska's transportation planning process, as well as that of the four metropolitan planning areas is being carried out in accordance with all federal laws, rules and regulations.

Nebraska's 2026 through 2029 STIP includes the following:

- **Financial information showing expected state highway cash revenues for the STIP period,**
- **A summary by fund category of all federal funds expected to be received and obligated by NDOT and the four MPO's during the STIP period,**
- **A detailed listing of state highway and local projects, excluding projects in the Lincoln, South Sioux City , Grand Island and Omaha MPO's. MPO projects are included by reference and are shown as a line item by funding category in the STIP,**
- **A listing of Section 5310 and 5311 transit projects,**
- **Listings of BIA and Federal Lands projects if available at the time of publication. If unavailable, these will be added by revision as they are received.**

Additional information on the development of and details included in the STIP can be found at:

<https://dot.nebraska.gov/projects/publications/stip/>

Performance Management Inclusion in NDOT STIP

Introduction

In November 2021, federal transportation legislation called the “Infrastructure Investment and Jobs Act,” commonly referred to as IIJA, increased federal investments for new infrastructure. These measures are in addition to those enacted by the Moving Ahead for Progress in the 21st Century Act and the Fixing America’s Surface Transportation Act (FAST Act), Public Law No. 114-94, that implemented a performance-based approach for the Statewide and Metropolitan Transportation Planning Process in 2015. Since 2017, the Nebraska DOT (NDOT) has been collecting and reporting performance data in accordance with the federal requirements. The following sections describe NDOT’s use of performance management in its processes and decision making related to STIP Development. Established measures were developed to reflect national goals which included things like safety, infrastructure condition, air quality, and transportation system performance. Since then, NDOT has been collecting and reporting performance data in accordance with the federal requirements. The following sections describe NDOT’s use of performance management in its processes and decision making related to STIP Development.

Cooperation

NDOT has worked with its transportation partners (MPOs and transit providers) since 2016 to implement the performance measure requirements of the IIJA, MAP-21, and FAST Act. The effort has led to provisions for collecting and sharing transportation performance data, the selection of performance targets, and the reporting of performance targets pursuant to 23 C.F.R. 450.314(h).

Project Selection Process

The STIP’s purpose is to provide for the development and integrated management of the state’s transportation systems. These systems and their performance are complex since they interact with the natural and man-made environment. To better understand the correlation between NDOT action, the environment, and various performance outcomes, NDOT engages in data collection. This data allows decision makers to assess the performance of the system. Unfortunately, data is only a reflection of a complicated interplay between NDOT decisions and the environment. As such, the NDOT leverages performance outcomes as only a part of its project selection process for the STIP. Other things that NDOT considers in its project selection process include funding, stakeholder input, project readiness, other NDOT performance metrics, and a host of additional factors. In other words, no single performance number or combination of numbers decide which projects are added to the STIP. The following paragraphs further describe how NDOT is using performance-based activities to inform its business practices and influence its planning documents for STIP development.

As mentioned previously, transportation systems are comprised of complex interactions between the user, the environment, materials, ect. Federal performance measures set forth in IIJA, MAP-21 and the FAST Act are essentially high-level reflections of what is happening; but may not be able all of what is happening. This is why NDOT also employs numerous other performance-based activities to inform its decision making and project selection.

At the ground levels of the organization, teams are measuring daily activity and reporting performance to their peers during a daily huddle. This performance data is used by the manager to assess the team's productivity and effectiveness. Ultimately, the manager's performance evaluation is tied to the performance of the team they manage.

In addition to this, NDOT continues to build and support its use of a "data warehouse". The data warehouse serves as a central point where all data collected by NDOT can be accessed for analysis and reporting. In the past, data was stored in different locations and in different formats, making it difficult to compile and analyze. NDOT's ongoing efforts to centralize and standardize data are leading to better real time management of projects and processes through the use of dashboards and other reports.

Another effort related to the formation of a data warehouse is NDOT's data analytics contract. NDOT has hired a data scientist to help study statistical correlations between actions, environment, and performance outcomes. These studies use statistical models and tools to test hypotheses against performance data. The results of these studies give NDOT a better understanding of which "inputs" have the greatest influence on a desired outcome. For example, NDOT studied which factors had the greatest influence on the number of bids we received. With this information, NDOT pinpointed the factors with the greatest influences and exploited that knowledge to attract more bids, thereby driving down contract awards. Through these types of studies, NDOT hopes to continually refine its business practices to improve project delivery and cost effectiveness.

The measurement and analysis activities described in the previous paragraphs are important since they provide quantifiable insights. However, data alone cannot sufficiently inform all aspects of decision making. This data needs to accompany various planning exercises to fully form a comprehensive decision making process. For example, planning documents such as the Strategic Highway Safety Plan, Transportation Asset Management Plan, Freight Plan, and others are informed by data and give stakeholders context from which they can set a vision, goals, and objectives. At the same time, technological changes, policy changes, and other cultural shifts may change the stakeholder's values, creating the need to reevaluate the data NDOT collects and analyzes. In the end, NDOT needs both data and the 3C planning process to continually refine the decision making related to projects selected for the STIP.

The preceding paragraphs describe how multiple inputs, including performance measures, influence the program of projects published in the STIP. It is important to explore the individual performance measures that influence NDOT's decision making. The following paragraphs describe the specific federal performance measures along with the associated NDOT targets.

Safety

When it comes to improving safety, the NDOT uses a strategic approach that is based on available safety information for its Highway Safety Improvement Program (HSIP). In accordance with the FHWA final safety performance measure (PM1), NDOT's HSIP established safety performance measure requirements for the purposes of carrying out the HSIP and also to assess fatalities and serious injuries on all public roads. NDOT's Strategic Highway Safety Plan (SHSP) is a major component and requirement of the HSIP in accordance with 23 U.S.C. § 148. The NDOT SHSP is a statewide-coordinated safety plan that provides a comprehensive framework for reducing highway fatalities and serious injuries on all public roads. NDOT's plan identifies the most important safety needs and helps to make decisions on projects for safety concerns. NDOT's SHSP can be found at.

<https://dot.nebraska.gov/safety/shsp/>

With these things in mind, the NDOT emphasizes the selection of projects for its HSIP that address the two infrastructure-based Critical Emphasis Areas in the SHSP, Roadway Departure crashes and Intersection crashes. Projects are selected from hazardous location analysis in one of three different multi-disciplinary safety committees which oversee the HSIP. Before a project is selected accident studies, collision diagrams, and maps are examined and occasionally a field review is performed. Benefit/cost ratios are also calculated and used for project selection. Each year the selected projects go through a review and are prioritized in the HSIP Strategic Plan. These projects are then programmed in the STIP according to readiness, funding availability, and competing needs.

Safety Targets

To meet the intent of 23 CFR 450.216 (f) (1) and future updates required in 23 CFR 450.216 (f) (2), the actual adopted Safety targets are displayed in **Table 1**.

Safety Performance Measures - 23 CFR 490 Subpart B

Safety performance measure targets:

- 1) Number of Fatalities
- 2) Rate of Fatalities per 100 million VMT
- 3) Number of Serious Injuries
- 4) Rate of Serious Injuries per 100 million VMT
- 5) Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries

NEBRASKA HSIP PERFORMANCE MEASURES - Baseline 2024							Target Year 2026			
HSIP PERFORMANCE MEASURE	Projected 2022 2026 Actual Avg	Projected 2022-2026 Rolling Avg.	2024 Yearend Actual Values	2026 Yearend Actual Values	5-Year Rolling Average			2026 Target Achieved?	Better Than Baseline?	Met or Made Significant Progress?
					NDOT Target 2021-2026 (A)	Actual 2021-2026 (B)	Baseline 2019-2024 (C)			
Number of Fatalities	252.0	237.8	251.0		235.0	^	235.2			
Fatality Rate	1.092	1.127	1.150		1.120	*	1.122			
Number of Serious Injuries	1,182.8	1,130.8	1,186.0		1,183.0		1,232.4			
Serious Injury Rate	5.071	5.352	5.433		5.357		5.880			
Number of Non-motorized Fatalities and Serious Injuries	151.8	102.2	139.0		113.0	^	113.4			

*Selected targets based on a reduction of the current increasing trend by 1%

^Selected targets based on NHTSA requirement to show constant or improved performance.

(A) Calendar Year (CY) 2026 Targets are established and reported in the August 31, 2025 HSIP Annual Report.

0.005 added to targets for fatality rate and serious injury rate to offset rounding issues in FHWA calculations.

Nebraska HSO shares 3 targets with HSIP. Nebraska HSO submits number targets rounded to the nearest integer and rate targets rounded to the nearest hundredth. The 3 shared targets have been rounded to match the Nebraska HSO method.

Baseline Year 2024

(B) Actual performance is the 5-year rolling average ending in the year for which the targets were established.

Calendar Years: 2022 Through 2026

(C) Baseline performance is the 5-year rolling average that ends prior to the year in which the targets were established. Baseline performance is calculated in order to compare whether the actual outcome was better than the baseline performance

Calendar Years: 2020 Through 2024

If a State has not met or made significant progress toward meeting its targets, the State must comply with the provisions set forth in 23 USC 148(i) for the subsequent fiscal year. The State shall:

1. Use obligation authority equal to the HSIP apportionment for the year prior to the target year, only for HSIP projects.

2. Submit an HSIP Implementation Plan that describes actions the State will take to meet or make significant progress toward meeting its targets. The HSIP Implementation Plan should guide the State's project decisions so that the combined 148(i) provisions lead to the State meeting or making significant progress toward meeting its safety performance targets in subsequent years.

If the State is determined to have not met or made significant progress toward meeting its CY targets, the State will have to use obligation authority equal to the defined HSIP apportionment year only for HSIP projects in the defined implementation year and submit an HSIP Implementation Plan for the same year.

HSIP Apport. Year	Target Calendar Year	Implementation Year
2025	2026	2029

Performance Measures #2 and #3

The NDOT reviewed and in some cases adjusted its performance targets for Performance Measure 2 (Infrastructure Condition), and Performance Measure 3 (System Reliability and Freight Movement) in September 2024 for the second four-year federal reporting period. The targets support the following national goals set for the Federal-aid Highway program:

- Infrastructure condition
 - To maintain the highway infrastructure asset system in a state of good repair.
- Congestion reduction
 - To achieve a significant reduction in congestion on the National Highway System.
- System reliability
 - To improve the efficiency of the surface transportation system.
- Freight movement and economic vitality
 - To improve the National Highway Freight Network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.
- Reduced project delivery delays
 - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

In order to monitor progress towards these goals, IIJA, MAP-21 and the FAST Act require the establishment of a number of performance measures by FHWA and the establishment of targets by state DOTs, public transit providers, and MPOs. These measures and targets are outlined in the following tables titled: *Infrastructure Condition and System Reliability and Freight Movement*. States and MPOs are required to evaluate conditions for these measures, set targets, describe how the projects included in the Statewide Transportation Improvement Program (STIP) and each MPO's Transportation Improvement Program (TIP) will help achieve progress towards the targets, and report on actual results and whether targets were met for the performance period.

Infrastructure Condition

PERFORMANCE MEASURE	2021 BASELINE	2023 2-YEAR CONDITION / PERFORMANCE	2023 2- YEAR TARGET	2025 4- YEAR TARGET	2025 4-YEAR ADJUSTMENT
% of Pavements of the Interstate System in Good Condition	77.5%	59.3%	65%	65%	50%
% of Pavements of the Interstate System in Poor Condition	0.1%	1%	5%	5%	
% of Pavements of the Non- Interstate NHS in Good Condition	56.0%	42.9%	40%	40%	
% of Pavements of the Non-Interstate NHS in Poor Condition	2.3%	3.8%	10%	10%	
% of NHS Bridges Classified as in Good Condition	57.7%	59.5%	55%	55%	
% of NHS Bridges Classified as in Poor Condition	2.0%	2.3%	10%	10%	

System Reliability and Freight Movement

PERFORMANCE MEASURE	2021 BASELINE	2023 2-YEAR CONDITION / PERFORMANCE	2023 2- YEAR TARGET	2025 4- YEAR TARGET	2025 4-YEAR ADJUSTMENT
% Interstate	98.8%	97.9%	98.5%	98.5%	96%
% Non-Interstate NHS	96.2%	92.4%	92.0%	92.0%	85%
TTTR	1.14	1.15	1.20	1.20	1.25

At a minimum, the NDOT meets with MPOs ahead of each performance reporting period to discuss performance and associated target setting methodology to coordinate its efforts. Beyond this coordination, NDOT subject matter experts review performance periodically and hold ad hoc coordination with MPOs where necessary. These meetings describe how NDOT uses a performance-based approach to manage its pavement and bridge transportation assets. Each year, NDOT reviews the performance of its assets, and its asset management practices, in order to define clear standards, provide the best service, and report on the progress made toward reaching performance goals. This information is compiled and disseminated in NDOT's annual report found at <https://dot.nebraska.gov/news-media/annual-report/>.

Moving forward, the NDOT will continue to use state performance measures for management of assets and reporting to the annual report. In addition, the NDOT will report the following pavement indices to the FHWA to be used in determining targets and/or progress towards target achievement for national performance measures:

1. Average IRI
2. Cracking Percentage
3. Average Depth of Rutting
4. Average Height of Faulting

These indices will be used to determine whether a pavement section is considered Good, Fair, or Poor.

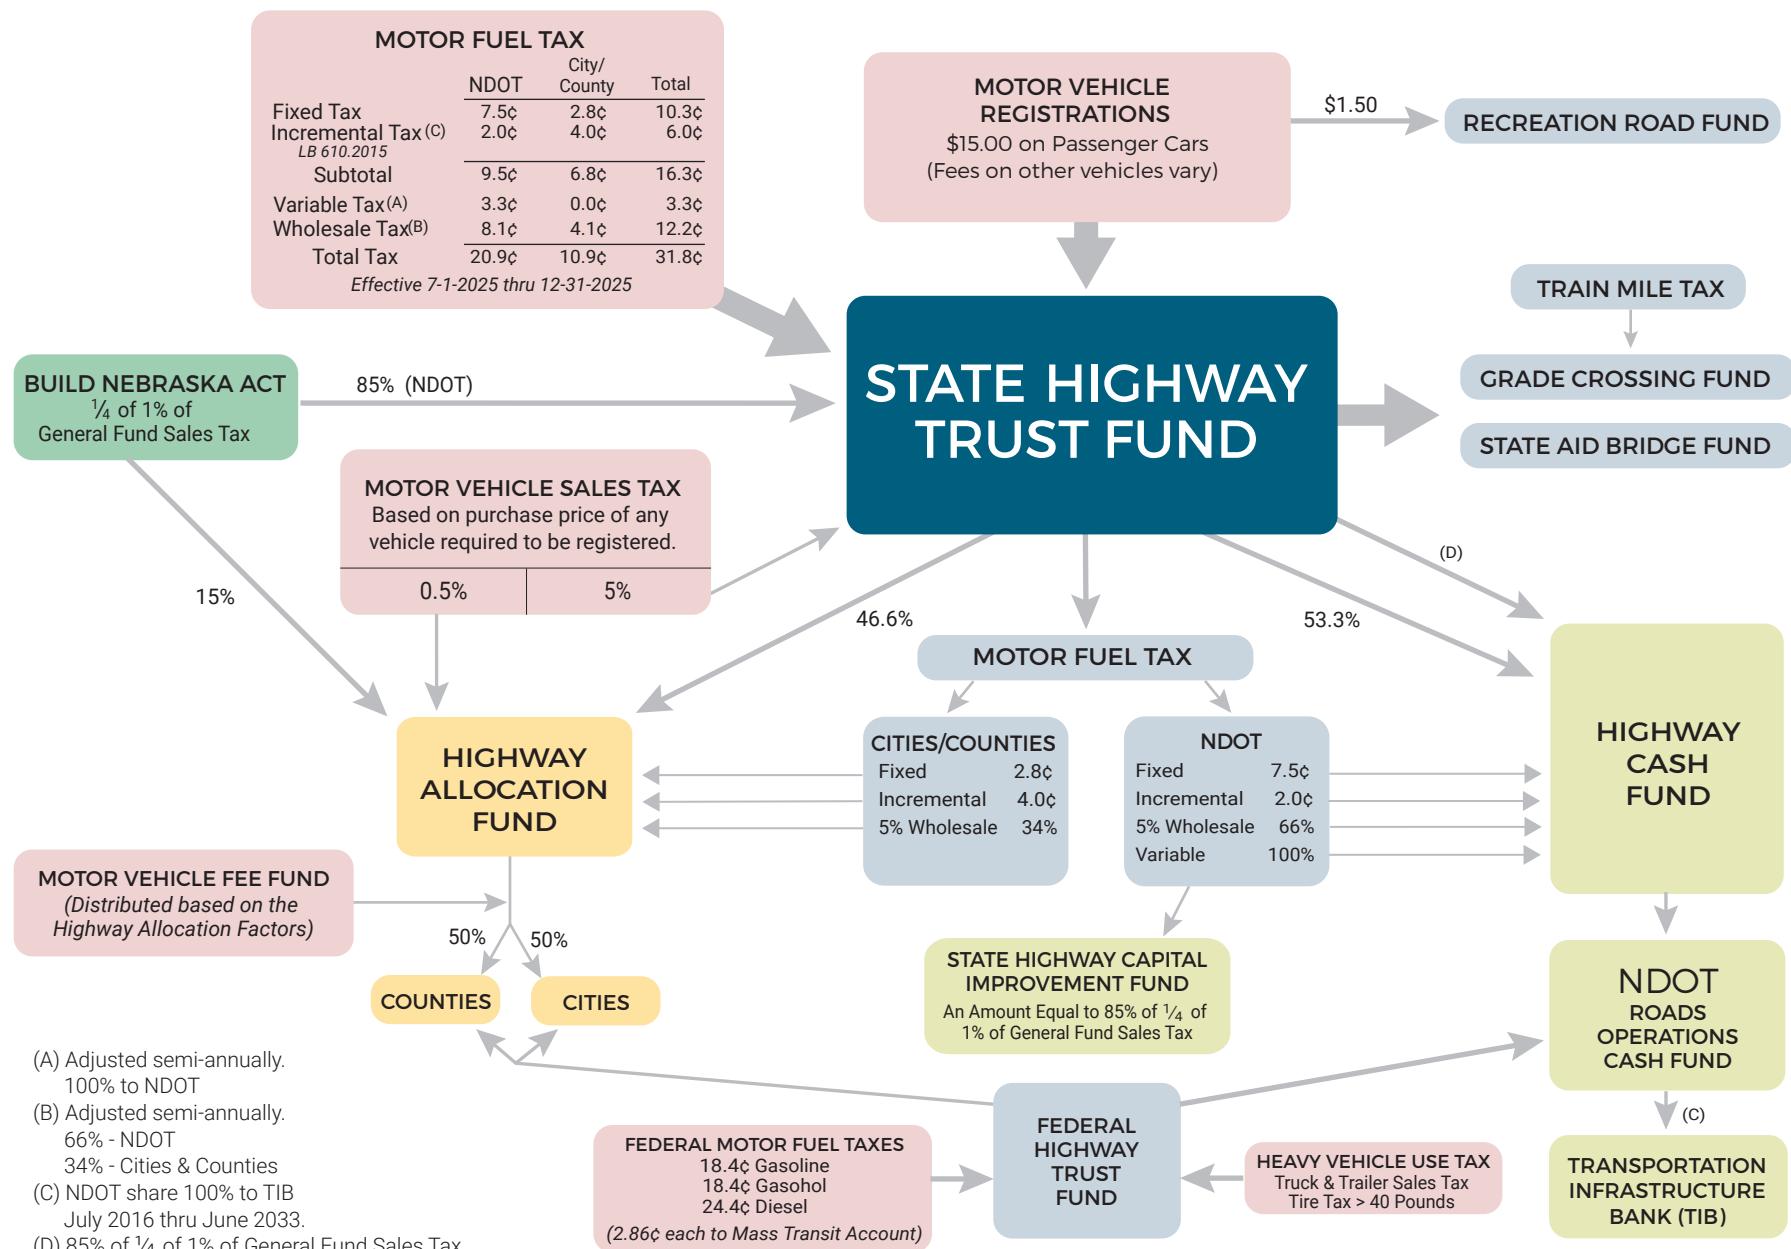

The NDOT will report the following bridge indices to the FHWA to be used in determining targets and/or progress towards target achievement for national performance measures:

1. Deck rating
2. Superstructure rating
3. Substructure rating
4. Culvert rating

These indices will be used to determine whether a structure is considered Good, Fair, or Poor. In some cases, if the state does not meet its targets, there will be restrictions on how certain funding programs can be used or additional planning efforts may be required.

Several offices across the NDOT continue working together to execute the requirements for performance measures, target setting, and reporting. The performance measures and targets will be integrated directly and indirectly throughout the planning and programming process. The Nebraska DOT will also continue to coordinate with the state's public transit providers and MPOs on target setting and monitoring.

\$30 million transferred from NHPP to STP in FY-26; \$20 million in FY-27, FY-28, & FY-29

Fund Descriptions:

NHPP - National Highway Performance Program

NHFP - National Highway Freight Program

STP - Surface Transportation Program - includes all funds allocated under this program except

those allocated to Lincoln and MAPA. Also includes miscellaneous funds apportioned

for use on any eligible Title 23 project; Congestion Mitigation, STP Infra,

Redistributed funds, Carbon Reduction, PROTECT, etc.

BRI - Bridge Infrastructure Program

BRO - Surface Transportation Program Funds set aside for off system bridges including Highway Infra Br Off System

STP Lincoln - STP funds allocated for use in the Lincoln Metropolitan Planning Area

STP MAPA - STP funds allocated for use in the Omaha Metropolitan Planning Area

EM - Earmarks - Discretionary, Demonstration, Federal Lands and other funds not distributed by federal formula

SFTY - Highway Safety Improvement Program (includes Rail Safety)

Grouped Project Categories:

TAP - Transportation Alternatives

Minor SFTY - Safety projects that are not regionally significant

RTP - Rec Trails Program

Adjustments *											
Fund	NHPP	STP	BRI	BRO	SFTY	LIN	MAPA	FP	TAP	EM	
Adjustments	30,000	(30,000)		0	0	0	0	0	0	0	

*Adjustments made to projects that are not on the current STIP, such as letting adjustments, modified agreements and final vouchers. Transfers between apportionments.

Date	C.N	Proj. No.	Reason	Fund	Amount (\$1,000)		
			Transfer NH funds to STP	NHPP	30,000	FV	Final Voucher - closing project adjustment
			Transfer NH funds to STP	STP	(30,000)	MA	Mod. Agmt. - adjustments for C.O.'s, overruns, etc.
						Let Adj	Post-letting adjust to low bid amount
						CE Adj	CE Adjustment - Adjust CE to contract amount
						PE Adj	PE Adjustment - Adjust PE to contract amount

Grouped Project Estimates by Fiscal Year

Projects in these categories are not listed in the STIP individually unless they are part of a project of such magnitude to be considered regionally significant.

Grouped Project Categories	2026	2027	2028	2029
Minor Safety Projects	3,449	0	0	0
Transportation Alternatives	18,843	0	0	0
Recreational Trails	0	0	0	0

Interpreting the project details:

Control and Project Numbers - Project identifiers assigned by NDOT. The first digit in the control number is the field district in which the project is located.

Jurisdiction – entity responsible for carrying out the project.
