

PCC Sampling and Testing – Percent Air—Quick Reference Guide

Pursuant to sampling and testing requirements as prescribed by the NDOT Materials and Sampling Guide,

Project inspection personnel will create the SMGR sample record to document PCC sampling and testing using these specific parameters.

Material Code, Name, and Description:

1002PCC, Portland Cement Concrete

Test Templates:

PCF008, Percent Air

The primary air information shall be recorded on the PCC Proportions template (PCF011); as subsequent air tests are performed the data will be captured in the Percent Air template.

As this test has the potential to be performed independently of other testing, the data captured on this test template is unique to air.

Additional test runs are available from the Assign Sample Tests Window.
