

Form RFQ-C

Respondent's Clarification Request

Niobrara E&W Project

April 27,2022

RFQ Section No. or Appendix	Question	Reserved for Department Response
Appendix B-3	Regarding Table B-1: Specifications for SOQs on page Appendix B-3, Main SOQ Section, Technical Information. It appears the bullet for Respondent's Organization (6.1.2) is missing and the sub-bullets are located under the bullet for Respondent Team Experience and Past Performance (6.1.1).	Table B-1 has been revised to conform with structure in Section 6 of the RFQ and included as Addendum #1.
Form E-1 and E-2	Regarding the Level of Company's Participation Column on Form E-1 and E-2 – the corresponding notes below the table specify that the Respondent report its participation in terms of money and percentage for Pre-Construction and Construction Services respectively. The intent of this column to report what percentage the contractor served as a prime on the contract itself vs. being a member of an external joint venture or subcontractor.	Example, if the Respondent was the sole Prime Contractor on Preconstruction for a project reported on form E-1, the result would be 100% followed by listing the associated contract value.
General	Please share the Pre-Construction Services Fee.	There will not be a set Pre-Construction Services Fee for the Project from NDOT. A draft Pre-Construction Services Agreement will be provided in the RFP. The final scope and fee proposal will be negotiated with the selected contractor.
General	Will NDOT provided a draft RFP, Pre-Construction Agreement, and Construction Contracted for the RFQ?	These documents are reserved for shortlisted Respondents.
Section 5.1	Does the statement regarding material modifications to the forms pertain to the footer of the forms? i.e. Can the footer of the form be modified to indicate the document is the Respondent Statement of Qualifications?	Modification of header, footer, or page numbers are NOT considered a material change.
