**FOR IMMEDIATE RELEASE**

## Work Suspended on N-17, Culbertson South

January 20, 2023 (McCook, Neb.) — Due to weather conditions, work has been suspended on the Culbertson South project, from reference post 6.85 to reference post 17.85, according to the Nebraska Department of Transportation. Work is expected to resume in early spring when weather is acceptable for concrete flume work or asphaltic concrete paving.

Paulsen Inc. of Cozad, Nebraska has the contract. Work remaining includes finishing the asphalt overlay, concrete joint sealing, concrete flumes, grading, and seeding.

Once work resumes traffic will be maintained with lane closures and a pilot car and flaggers. The project is anticipated to be completed by spring 2023.

Motorists are reminded to drive cautiously in and near work zones, to buckle up, and put phones down.
