**FOR IMMEDIATE RELEASE**

**Information Open House November 13 for Improvements on US-6 and Adams Central Ave. in Hastings Area**

October 30, 2018 (Lincoln, Neb.) — The Nebraska Department of Transportation (NDOT) will hold an information open house November 13 regarding proposed improvements to the intersection of U.S. Highway 6 (US-6) and Adams Central Avenue outside of Hastings. NDOT will give a formal presentation starting at 5:30 p.m., followed by an open house until 7:30 p.m. The meeting will be held at the Hastings Auditorium, 400 N. Hastings Avenue, in Hastings.

The proposed project would build an intersection improvement that would cost-effectively address the project purpose and need. The purpose of the proposed project is to reduce the frequency and severity of crashes at the intersection of US-6 and Adams Central Avenue, improve the mobility of the traveling public, and improve the reliability of the transportation system. The project need is based on the history of crashes at this intersection, as well as to address the additional traffic within the area upon completion of the new elementary school.

Alternatives being considered include, but are not limited to, the following: no build, all way STOP control, traffic signal alternatives, speed limit change, geometric modifications, or a roundabout. Project limits may extend approximately 0.25 miles in each direction from the intersection.

Additional project information will be provided at the public meeting. Personnel from the Department of Transportation will be available to answer questions, receive comments, and discuss any aspect of the proposed intersection improvement project. Information regarding the project will be available on the NDOT website [www.dot.nebraska.gov/projects/future-projects/](http://www.dot.nebraska.gov/projects/future-projects/) by clicking on the “US-6 and Adams Central Intersection” link.
