

Kickstart a High-Demand Tech Career!

INVEST IN YOUR FUTURE WITH
NDOT'S SCHOLARSHIP PROGRAM

The need for highly trained technical professionals is critical to meeting the future needs of Nebraska's workforce. That's why, through the **Good Life, Great Journey Scholarship Program**, NDOT invests in students seeking two-year degrees in high-demand technical fields.

Scholars receive a fully funded education, gain hands-on experience through a paid, part-time internship, and—upon successful completion—a direct path to a career with NDOT!

The best part? We cover the costs. Tuition, tools, and housing are all included, allowing students to focus on their education and build the skills needed to succeed in these in-demand roles.

These future diesel mechanics, engineers, land surveyors, and other specialists directly impact the success of our transportation system and the future of the Department. By growing opportunities here at home, we can retain skilled trades professionals in Nebraska and strengthen the state's future.

Become a land surveyor

Build your skills in drafting and design

Explore hands-on training in diesel technology

SCHOLARSHIP BENEFITS
