

October 7, 2025

Statements of Qualifications are due Wednesday, October 15, 2025, 1:00 P.M.

The following answers are in response to consultant's questions.

1. Q. Has NDOT completed survey and if so, to what width from centerline of corridor?
A. *The survey for US 75 is approximately 900 feet wide, with additional allowance at crossroads. The survey is estimated for completion on December 1, 2025.*

2. Q. Are there any previous Environmental documents and can they be made available?
A. *The Nebraska City to Murray corridor is a state funded project to add capacity along US-75. This corridor was originally part of the Nebraska City to Bellevue Corridor Study (EIS 1979; FSEIS, 2000, and reevaluations), and all segments were constructed per the preferred alternative; therefore, NDOT considers the EIS evaluated federal action to be complete (and has received FHWA concurrence). As such, NDOT plans to carry out the future state funded expansion project without linkage to the 1979 EIS. NDOT will not be providing any environmental documents for this RFQ response.*

3. Q. Has NDOT completed any geotechnical investigations, or will those be part of the Phase II efforts completed by the Consultant?
A. *This will be done internally. If necessary, we will use our on-call contract for geotechnical services.*

4. Q. Will NDOT cover railroad coordination?
A. *Yes, this will be performed by NDOT.*

5. Q. Would NDOT consider allowing a small number of 11X17 pages for the proposal?
A. *Yes, a small number of 11X17 pages is allowable.*
