Presentation Focus: The panel will be well versed in the organizational structure and technical responses provided in the Statement of Qualification for this RFQ. NDOT asks that you not focus a lot of time presenting on those areas unless there have been changes you want to highlight. Instead, NDOT suggests the interview contains information such as the following:

- Describe the adaptability of the solution(s) to be delivered under this contract. How can changes be implemented and who can make them? Discuss how functional assessments may change how a GIS tool is used.
- Discuss a changing regulatory landscape and how this may change future permitting and mitigation needs.
- Elaborate on the solution you propose to meet our current and future needs.
- Each firm should be prepared to answer a variety of Committee questions at the conclusion of their prepared presentation.
