ALCOHOL / DRUGS

ALCOHOL IMPAIRMENT CHART (BAC CHART)

	Type	Quantity
This pocket size chart is an alternative method of calculating the approximate blood alcohol content (BAC) level of impairment by weight and drink. There is no blood alcohol calculator that is 100% accurate due to the number of factors regarding the consumption and reduction (burn off) rates of different people. This is a rough estimation of the BAC based on the following: the sex (male/female) of the drinker, drinking frequency, and elapsed time.	Chart 3" x 3"
