

## Warm Mix Asphalt - Quick Reference Guide

At the completion of the asphalt for a project, NDOR field personnel shall identify what, if any, Warm Mix Asphalt (WMA) was used on the project. This information can be found on the mix design approved by the NDOR Bituminous Aggregate Laboratory, and verified on the binder 'Bill of Lading' obtained from the contractor.

If WMA was used on the project, NDOR field personnel shall create a sample record for the material and attach an Approved Products Usage Verification test.

Approved WMA products can be found in the 'Warm Mix Asphalt' section of the contract provisions.

Material Code, Name, and Description:

**1028WMA – Warm Mix Asphalt**

Test Templates:

**MSF001001 – Approved Product Usage Verification**
