

Strip Seal - Quick Reference Guide

Contractor will provide strip seal acquired from approved manufacturers as shown in the plans. Although these materials are primarily validated via documentation, the Materials & Research Division may request a physical sample.

In accordance with the material requirements denoted on the SMGR Sampling Checklist, **NDOR field personnel** will create a SMGR sample record.

Material Code, Name, and Description:

This new material code, designated as **730SS, Strip Seal**, has been included in SMGR to fulfill sampling and testing requirements

Test Templates:

The test method associated to this test process includes:

MSL004001, Certificate of Compliance – Central Lab

MSL005001, Certificate of Test – Central Lab

PTF005001, Producer Supplier Buy America Certification

NDOR Central Laboratory personnel will validate the receipt of associated documentation and materials.
