

## **Asphaltic Concrete Mix Design Submittal and Acceptance - Quick Reference Guide**

Pursuant to sampling and testing requirements as prescribed by the NDOR Materials and Sampling Guide, **contractor** submits asphaltic concrete mix design to the NDOR Bituminous-Aggregate Laboratory Manager for evaluation and approval.

Personnel from the NDOR Bituminous-Aggregate Laboratory will create the SMGR sample record to document the asphaltic concrete mix design using these specific parameters.

### **Material Code, Name, and Description:**

503A0101, Asphaltic Concrete

### **Test Templates:**

BAL002001, Asphaltic Concrete Mix Design

BAL005001, Asphaltic Concrete Test Summary

NDOR Bituminous-Aggregate Laboratory will upload the mix design submittal and test summary to OnBase. Mix Design and associated materials (if applicable) will be forwarded to the NDOR Aggregate Laboratory for evaluation.

At the conclusion of the evaluations noted above, the resulting determination will be returned to the **contractor**. If approved, the NDOR Bituminous-Aggregate Laboratory Manager will prepare the approval letter and forwarded to the **contractor** and uploaded to OnBase.
