FOR IMMEDIATE RELEASE

CCTV camera installation will begin on North N-71

Oct. 13, 2026 (Gering, Neb.) — Weather permitting, work will begin Oct. 19 on a project to install a roadway camera north of Scottsbluff on North Nebraska Highway 71 (N-71), from reference point 90 to reference point 91, according to the Nebraska Department of Transportation.

The camera is being installed to support the Department's winter operations. It will allow NDOT Operations' managers to remotely observe roadway and weather conditions and use that information to assist with decision-making during winter weather events.

The cameras are intended to monitor roadway and weather conditions and are not intended to monitor individual motorists. The live camera feeds will be incorporated into Nebraska's 511 Traveler Information network, allowing the public to view current roadway conditions and make informed travel decisions.

Primary Acquisition Group, Inc., of Grand Island, is the contractor for this project. Anticipated completion is Nov. 1, 2026.

Motorists are reminded to drive cautiously in and near work zones, to buckle up, and put phones down.
