**Presentation Focus:** The panel will be well versed in the organizational structure and technical responses provided in the Statement of Qualification for this RFQ. NDOT asks that you not focus a lot of time presenting on those areas unless there have been changes you want to highlight. Instead, NDOT suggests the interview contains information such as the following:

- Describe how your firm ensures architectural intent is clearly presented to the contractor in the construction documents.
- What process(es) does your firm employ to minimize missing or incomplete details on construction documents.
- What is your management experience with projects that rely on subconsultants more heavily than the architectural design.
- When communication breaks down on a project, what can the consultant team do to reset the communication tone?
