Presentation Focus: The panel will be well versed in the organizational structure and technical responses provided in the Statement of Qualification for this RFQ. NDOT asks that you not focus a lot of time presenting on those areas unless there have been changes you want to highlight. Instead, NDOT suggests the interview contains information such as the following:

- Explain how your firm implements a hybrid structure from top to bottom. What role will NDOT leadership play in the structure and what is schedule for transitioning to consultant management? Describe the pros and cons of hybrid structures. How do you involve the current NDOT team and foster integration into a combined team?
- Expand on firm's certifications and training program.
- Describe how your firm will create and maintain trust in the field.
- Each firm should be prepared to answer a variety of Committee questions at the conclusion of their prepared presentation.
