

Asphaltic Concrete Quality Assurance/Quality Control Sample - Quick Reference Guide

At the prescribed intervals, **field personnel** create the quality assurance asphaltic concrete sample records using these specific parameters.

Material Code, Name, and Description:

503A0101, Asphaltic Concrete

Destination Lab

Designated laboratory where sample will be sent

Test Templates:

BAF001003, Asphaltic Concrete Sample Submission

BAL003001, Asphaltic Concrete Quality Assurance

NDOR branch laboratory or Bituminous-Aggregate Laboratory will evaluate the physical samples presented for testing.

In the event of an out-of-tolerance correlation test or a failing quality assurance sample, the NDOR Quality Assurance Section will notify the **field personnel** that either an independent assurance review will be conducted and/or additional samples from specific subplot(s) will need to be submitted for further evaluation.

NDOR branch laboratory or Bituminous-Aggregate Laboratory will update laboratory and **contractor** test summary results in OnBase.
