

Retroreflectivity Testing – Quick Reference Guide

Contractor will perform retroreflectivity testing as defined in the specifications. The results of this testing will be provided to the **NDOR Field personnel**.

In accordance with the material requirements denoted on the SMGR Sampling Checklist, the **NDOR Field personnel** will create a SMGR sample record.

Material Code, Name, and Description:

423THERMO - Thermoplastic Pavement Marking or

423POLY - Polyurea Pavement Marking

Test Templates:

CHF004001 - Wet Reflective Retroreflectivity - Linear - Field and/or

CHF005001 - Wet Reflective Retroreflectivity - Symbols/Legends - Field

NDOR Central Laboratory personnel will validate the associated documentation and review the retroreflectivity test results.
