**Presentation Focus:** The panel will be well versed in the organizational structure and technical responses provided in the Statement of Qualification for this RFQ. NDOT asks that you not focus a lot of time presenting on those areas unless there have been changes you want to highlight. Instead, NDOT suggests the interview contains information such as the following:

- Transitioning from PEL to starting NEPA process.
- Experience with IJR, knowledge of proposed new rule, and how it will be applied to this project? Include:
  - Importance of interchange connection with local network
  - Firm's expertise in interchange design
- Further explain the schedule included in proposal, including descriptions of the challenges/risks and how they will be mitigated.
- Each firm should be prepared to answer a wide variety of Committee questions at the conclusion of their prepared presentation.
