

DEPARTMENT OF TRANSPORTATION

RFQ Request for Qualifications

Professional Services for Downtown Lincoln Bike Network

September 9, 2026

Statements of Qualifications are due Wednesday, September 30, 2026, 1:00 P.M.

Responses to RFQ related questions

1. Will survey and geotechnical services be required for the project? : **The City will provide GIS data through the Clip Zip Ship application. Depending on the proposed modifications, additional verification of existing conditions may be necessary via site visits and/or survey. A full topographic survey of the four streets included in the project will not be required. Geotechnical services will not be required.**
2. Will the project have a FHWA federal nexus and be covered by NEPA assignment (NDOT), which would require a minimum categorical exclusion (via NDOT process)? **Yes, this will require a NEPA document approved through NDOT.**
3. The RFQ references AutoCAD for preliminary design work under Section C. Software and Equipment Requirements. Recognizing that multiple design platforms may be utilized across departments, does the City have a preference for AutoCAD or MicroStation, or may either platform be used? **Either platform may be used.**

Vicki Kramer, Director
Nebraska Department of Transportation
