NDOT Invites Nebraskans to Participate in Transportation Safety Workshop

Workshop and statewide survey will help inform Nebraska's next Strategic Highway Safety Plan

Oct. 2, 2026 (Lincoln, Neb.) – The Nebraska Department of Transportation (NDOT) is inviting transportation safety partners and members of the public to participate in the Nebraska Transportation Safety Workshop and help inform the state's next Strategic Highway Safety Plan.

NDOT is updating the plan for 2027–2031. The Strategic Highway Safety Plan establishes Nebraska's statewide transportation safety priorities, goals, performance measures and strategies for reducing fatalities and serious injuries on all public roads.

Nebraska Transportation Safety Workshop

October 13, 2026
10:30 a.m. to 12:30 p.m.
NDOT Auditorium (1500 Nebraska Pkwy, Lincoln, NE 68502)

The workshop will bring together transportation professionals, community organizations, safety advocates, local leaders and interested members of the public. Participants will review statewide safety trends, discuss potential priorities and share perspectives on challenges and opportunities related to implementing transportation safety strategies.

"The safety of Nebraska roadways is a shared commitment. This event gives us the opportunity to listen directly to our safety partners and the communities we serve. I look forward to discussing crash trends and hearing safety improvement ideas at the workshop." Don Butler, NDOT Traffic Safety Engineer.

NDOT will also offer a **statewide online survey** from October 13 through October 27, 2026. The survey provides an additional opportunity for Nebraskans to share transportation safety priorities and perspectives.

#MORE#

Workshop and survey feedback will be considered alongside crash data and technical analysis as NDOT evaluates critical emphasis areas and develops strategies for the updated plan.

To register for the workshop, take the survey or learn more, visit dot.nebraska.gov/safety/shsp/.
