**FOR IMMEDIATE RELEASE**

## Work Complete for US-30 Improvement Project in Columbus

**Nov. 7, 2025 (Norfolk, Neb.)** – Weather permitting, starting Nov. 7, the US-30 Improvement Project is complete and open to traffic, according to the Nebraska Department of Transportation (NDOT).

This project reconstructed approximately 2.69 miles of pavement along US-30/23rd Street between U.S. Highway 81 (US-81) and East 11th Avenue. Other improvements included new curb inlets and storm sewer, new pedestrian facilities and roadway lighting and updated traffic signals. Construction began in 2023 and was completed on time and on budget.

“It’s great to see the construction completed after three years of work,” Columbus Mayor Jim Bulkley said. “The final product looks fantastic. The project turned out very well and the citizens of Columbus are extremely happy with the result.”

NDOT District 3 Engineer Kevin Domogalla said “It is satisfying to see all of the hard work of the designers and contractors and the patience of citizens of Columbus result in a rather stunning project.”
