

## Asphalt Laboratory Technicians - Quick Reference Guide

At the commencement of a project, NDOR field personnel will identify the individuals responsible for acceptance testing and verification testing.

- Acceptance Testing Technician: Contract laboratory personnel responsible to conduct acceptance testing for the project
- Verification Testing Technician: NDOR Central or Branch laboratory personnel responsible to conduct the verification testing for this project

Once identified, NDOR field personnel shall use RUG to verify the contractor laboratory personnel and NDOR laboratory personnel hold current Asphaltic Concrete Technician certification. Certification issues should be addressed immediately with the local quality assurance manager.

Finally, NDOR field personnel will record the certification using the Asphaltic Concrete Laboratory Technician material and test method.
